

World Otter Day

26 May 2021

Help us to help the world's otters.

Creating awareness of otters and the importance of their conservation.

Conservation

Why are otters so important? Not only are they wonderful to watch but they are great indicators to a healthy environment, which is important for all species, including our own.

Protecting

Education

Research

12 of the 13 species worldwide are declining due to habitat destruction, reduction in available prey, road kill and in Asia illegal trade for fur and increasingly for pets.

International

Rehabilitation

Caring

We need YOU to help us to tell others about this and get them involved too.

So join in World Otter Day - visit:
